PROFESSIONAL EXPERIENCE

Frontend Developer | Next.js (Full-Time)

12/2025 – Present
USA

RebusAI

Develop AI-powered web applications using Next.js, Firebase, and modern frontend technologies. Build interactive learning platforms, authentication systems, payment integrations, and AI-driven features while working directly with clients to deliver scalable solutions.

Freelance Full-Stack Developer

05/2025 – Present
Remote

Multiple Clients

Build and maintain custom web applications for 3+ active clients using Next.js, React, TypeScript, Firebase, Node.js, and modern UI tools.

- Working across 5+ active projects, including SaaS platforms, AI-powered tools, affiliate marketplaces, e-learning platforms, and automation systems.
- Delivering end-to-end features such as authentication, dashboards, payment flows, admin panels, AI integrations, role-based access, and real-time communication.

Frontend Developer | Next.js (Full-Time)

11/2024 – 12/2025
Dubai, UAE

V-Verse

Develop and maintain core product modules including V-Webinars, Contracts, and V-College, while improving the existing codebase through refactoring, debugging, and scalable frontend architecture.

Technical Instructor (Part-Time)

11/2024 – present
Cairo, Egypt

Information Technology Institute (ITI)

Delivered over 50 technical sessions and practical workshops for 100+ web development trainees, covering core MERN stack topics such as version control, JavaScript, React, Node.js, and MongoDB.

Frontend Developer | React.js (Full-Time)

12/2023 – 11/2024

Plan B

Contributed to building and maintaining responsive React.js applications, creating reusable components, integrating APIs, and resolving UI/UX and performance issues to ensure smooth user experiences.

Backend Developer | Node.js (Full-Time)

02/2023 – 12/2023

A M Soft

Developed and supported RESTful APIs using Node.js, implementing business logic, handling database operations, and assisting in debugging and performance improvements to maintain reliable backend services.

Software Instructor (Full-Time)

11/2022 – 02/2023
Cairo, Egypt

ITech for applied technology school

Taught Java, OOP, SQL, and Computer Architecture courses to over 90 students, creating 20+ interactive lessons and coding activities. Achieved a 85% student satisfaction rate based on feedback.

EDUCATION

Information Technology Institute (ITI)

05/2022 – 11/2022

- Completed over 600 hours of training in MongoDB, Express.js, React, Node.js, Nest.js, Next.js, Angular.js, UI/UX design, database management, RESTful APIs, and modern frontend UI tools like TailwindCSS, and Bootstrap.

Bachelor's Degree of Communication and Electronics Engineering

09/2014 – 06/2019

Shoubra Faculty of engineering

- Graduation Project: Sub-System in a Cub-Satellite made by NARSS

SELECTED PROJECTS & FREELANCE WORK

Jezezy WA Sender (Chrome Extension – WhatsApp Outreach Automation)

06/2026 – Present

Techs used: JavaScript, Manifest V3, Chrome Extension APIs, IndexedDB, DevTools Protocol

- Building a Chrome extension for WhatsApp Web outreach with CSV/Excel import, reusable contact lists, duplicate detection, media messages, and controlled delivery delays.
- Solved background execution limitations using Chrome APIs to keep campaigns running reliably with minimal user interaction.

HR Spark (Arabic HR E-Learning Platform)

05/2026 – Present

Techs used: Next.js, TypeScript, Firebase, TailwindCSS, Radix UI, React Query, Bunny Stream

- Building an Arabic (RTL) course platform with role-based dashboards, an e-wallet payment + admin approval flow, and video progress tracking.
- Implementing secure tokenized video streaming with access control, concurrent-stream limits, and per-user watermarking to prevent account sharing.

Real Estate Distress Finder (UAE Property Intelligence Bot)

04/2026 – Present

Techs used: Next.js, TypeScript, Python, FastAPI, Firebase, Playwright, Vercel, Telegram Bot API

- Building a Telegram bot that analyzes Bayut and PropertyFinder listings to identify high-opportunity UAE real estate deals using price drops, reposts, time on market, and duplicate listings.
- Designed a two-service architecture separating the user-facing bot from the background scraping service for better reliability and scalability.

CVRM (Customer & Vendor Relationship Management)

10/2025 – 02/2026

Techs used: React.js, TailwindCSS, SWR

- Contributing to a multi-tenant customer and vendor management platform with role-based dashboards and workflow automation.
- Developed lead management, contract tracking, ticketing, and real-time notification features.

MerchApp

06/2025

Techs used: Next.js, Firebase, Zustand, TailwindCSS, Radix UI, ImageKit

- Built a role-based affiliate marketplace featuring merchant dashboards, analytics, location-aware discovery, and product management.
- Implemented authentication, personalization, wishlists, trending products, and administrative controls.

TrendsApp

05/2025

Techs used: Next.js, Firebase, Shadcn, AI SDK, Zustand, Zod

- Developed an AI-powered trend discovery platform aggregating content from Google, YouTube, Reddit, and other sources.
- Integrated AI-driven content generation, subscriptions, authentication, and responsive user experiences.

SKILLS

Frontend — React.js, Next.js, TypeScript, TailwindCSS, shadcn/ui, Radix UI, Zustand, React Query, SWR

Backend — Node.js, Express.js, Nest.js, Firebase Admin, REST APIs

Database — MongoDB, Firebase, SQLite

Tools — Git, GitHub, ImageKit, Playwright, Vercel, Chrome Extension APIs, Bunny Stream

Features — Authentication, Payments, AI Integrations, Maps, Dashboards, Role-Based Access

Programming languages — JavaScript, TypeScript, Java, C, C++

MILITARY STATUS

Accomplished as an Officer

10/2019 – 04/2022
